FAX:(406)-444-4952  
Ref:DO147-06  
March 17, 2006

Dear Interested Party:

Enclosed you will find a copy of Montana Fish, Wildlife & Parks "2006 Stocking Plan". This plan lists the waters to be stocked in alphabetical order by region. This format will provide an easy way to find the information you are looking for. You are also encouraged to visit Fish, Wildlife & Parks web site at [fwp.mt.gov](http://fwp.mt.gov) where you find information on fishing, hunting, parks, the stocking plan and much more related to Montana's great outdoors resources. To find the stocking plan on line go to <http://fwp.mt.gov/fishing> and use the tab to the right "quick access" then 2006 stocking plan.

This report lists the county, name of the water, the species and strain of fish, and the size and number to be stocked in each water. It also provides the name of the hatchery that will be doing the stocking and the source of the eggs used to provide these fish. Feel free to send any comments about this plan, the format, or changes that would make this more user friendly to, FWP Fisheries Division.

#### **About Montana's Hatchery System**

The propagation and stocking of fish has been a vital part of FWP activities since the early 1900's. The first State of Montana hatchery began operating in 1908 at what is now Washoe Park Trout Hatchery in Anaconda. Since that time, a number of hatcheries were built, and some of the smaller facilities were closed resulting in the nine hatcheries currently operated by the FWP. These nine hatcheries are located in, Anaconda, Arlee, Big Timber, Bridger, Eureka, Great Falls, Lewistown, Miles City, and Somers. A new hatchery that FWP and the U.S. Army Corp of Engineers have worked cooperatively on is the state of the art facility near the town of Fort Peck – Late in 2005 the Fort Peck Multi-Species Hatchery became operational and will be in full production early in 2006. You are always welcome to visit Montana's Fish Hatcheries and are encouraged to ask questions of our staff.

Montana is known for its naturally reproducing and quality fisheries. Today, stocked fish are compatible with resident populations and, under strict genetic protocol are only used to restore native fish into their historical habitat. In those reservoirs and lakes where natural and native fish cannot sustain a fishery on their own, supplementation with hatchery fish provides the necessary numbers, species, and strains to augment those populations and provide fishing opportunities to all anglers. Today's modern hatchery system is vital in providing the necessary fish for fishery management throughout Montana.

Attached is a map showing the location of Montana's hatcheries. I invite you to visit one of these facilities and observe our hatchery system at work. They also provide guided tours for school and civic groups with advanced reservations.

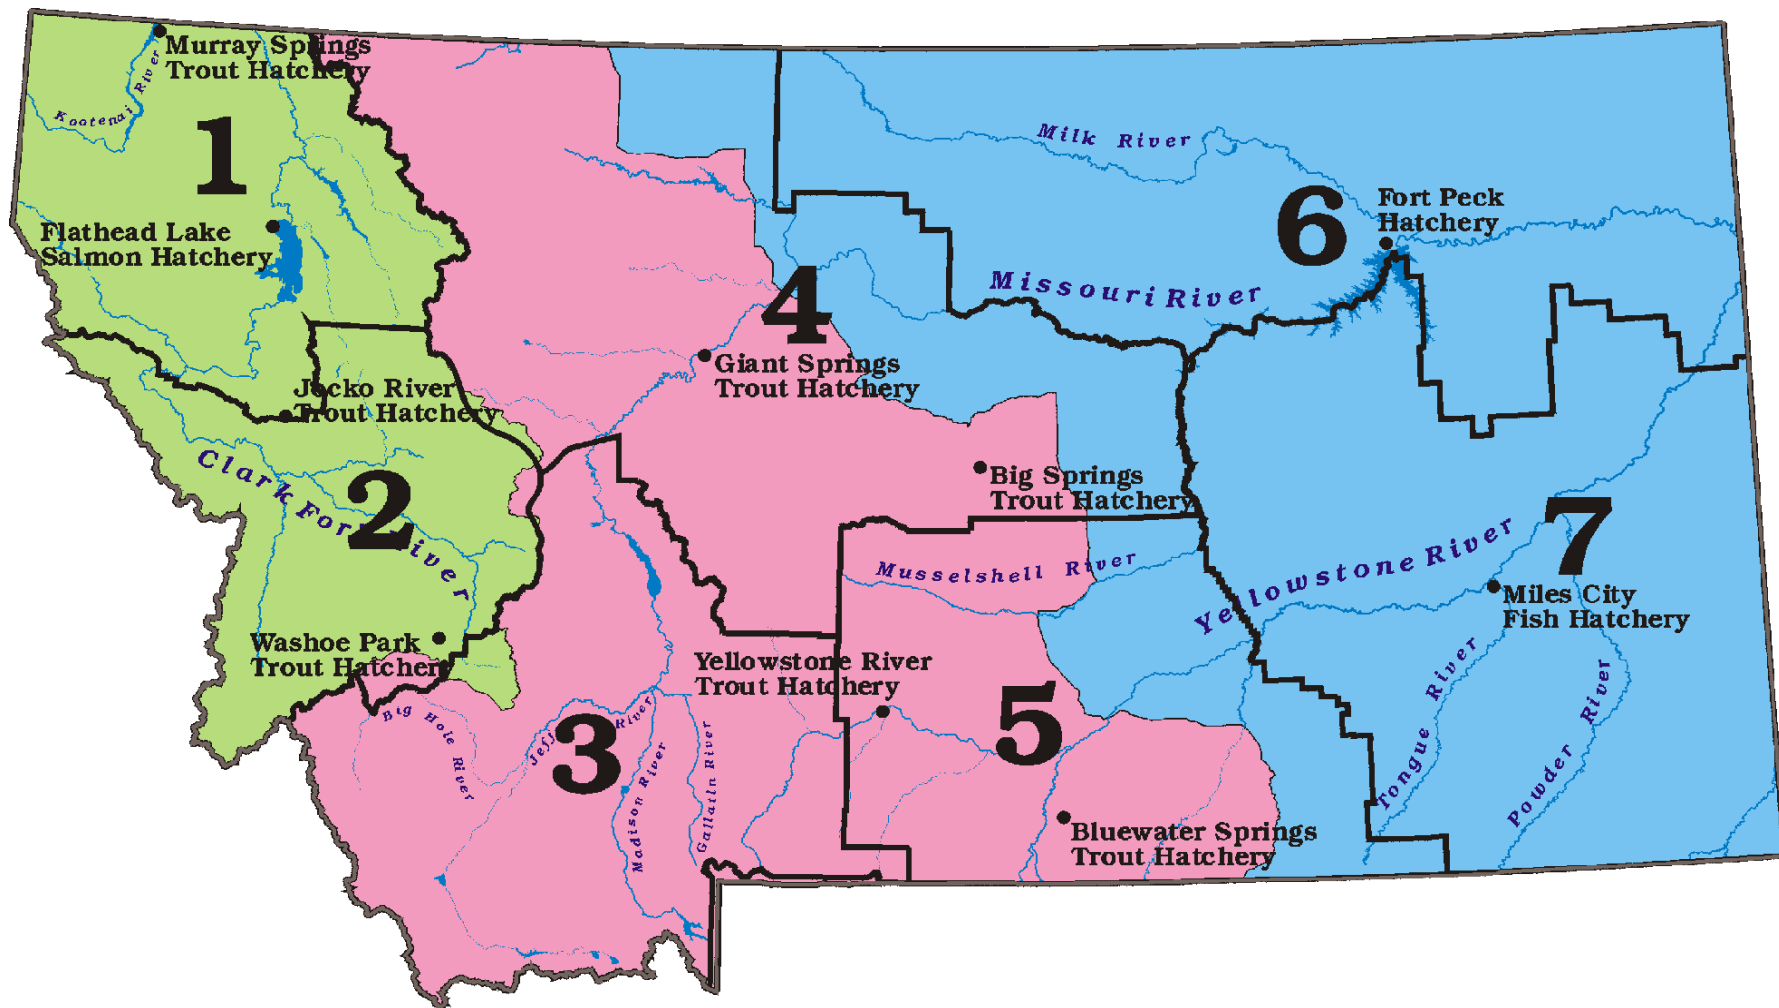

If you have any questions, suggestions, or comments regarding this stocking plan or the hatchery system in general, please contact the Fisheries office at 1-406-444-2449 or address noted above. Thank you for this opportunity to present information regarding one of FWP's important activities and hope you go out and enjoy the great outdoor resources Montana has to offer.

Sincerely,

*Larry G. Peterman*

for M. Jeff Hagener  
Director

Enc.

## Montana Fish, Wildlife and Parks 2006 Fish Stocking

Water Name	County	Species	Strain	Hatchery	Egg Source	Reason	Size	Number
Region 0
